Patent case: Edwards Lifesciences v Boston Scientific, United Kingdom

Sara Moran · Monday, July 2nd, 2018

In a case concerning two divisional patents derived from the same parent application, relating to ‘transcatheter heart valves’ or THVs, the Court of Appeal upheld the High Court’s decision that one patent was invalid for lack of inventive step and the second patent was valid. The Court of Appeal also provided guidance on cross-examination of expert witnesses, in particular best practice in the situation where a party chooses not to cross-examine a witness.

Case date: 28 March 2018

Case number: [2018] EWCA Civ 673

Court: Court of Appeal of England and Wales, Civil Division
