Patent case: Edwards Lifesciences LLC v Boston Scientific Scimed Inc, United Kingdom

Sara Moran · Saturday, August 11th, 2018

The Court ordered a twelve month stay of the injunction granted when it found one of Boston's patents concerning a transcatheter heart valve (THV) valid and infringed by Edwards' medical device, in order to allow for the re-training of clinicians to use non-infringing THVs. The Court also held that, even after that stay, the injunction should be qualified such that Edwards' THVs could continue to be used for patients for whom there is no alternative (on condition that clinicians signed a declaration to this effect).

Case date: 24 May 2018

Case number: [2018] EWHC 1256 (Pat)

Court: High Court of Justice of England and Wales, Chancery Division, Patents Court
